

# GovSENSE

## GOVSENSE FOR FINANCE DIRECTORS

Gain a 360-degree view of your jurisdiction using just one easy-to-use system with the strongest security giving you unrivaled internal controls.

### Transparency & Visibility

GovSense greatly simplifies the tasks for finance departments. Using one system throughout all departments allows the finance team a real-time comprehensive view of any report from a high level down to the transaction level without ever relying on IT to produce custom reports.

#### 1 Better *Mitigating risk & improving collections*

##### Security you can trust

Stringent security policies monitor all alarms and access points. Our enterprise-grade anti-virus software guards against trojans, worms, viruses and other malware from compromising the software and applications.

##### Enjoy built-in compliance

Confidently accept, store and transmit credit card information in our secure, PCI-Compliant environment. Accepting card payments will eliminate much of the headache for your staff and constituents alike.

#### 2 Faster *Improving workflow & delivering efficiencies*

##### Face audits confidently

Keep real-time data at your fingertips so you never have another surprise during an audit. Auditors can easily navigate the GovSense system to get the data they need to complete their tasks quickly and painlessly.

##### Improve reporting & budgeting

Our easy-to-use reporting features gives users unparalleled control when building any kind of report. Without requiring the help of the IT, users are able to configure reports and run them as often as they'd like.

##### Process permits faster

Our single, integrated system allows you to significantly cut permit processing and review time. Instead of waiting weeks for permits to process and even longer to receive payment, GovSense enables jurisdictions to see revenue much faster.

##### Budgeting & Forecasting

Decrease the time it takes to create, analyze and adjust budgets with quickly configurable budget and forecasting capabilities. Visibility into all departments allows faster, more informed decision-making across the entire organization.

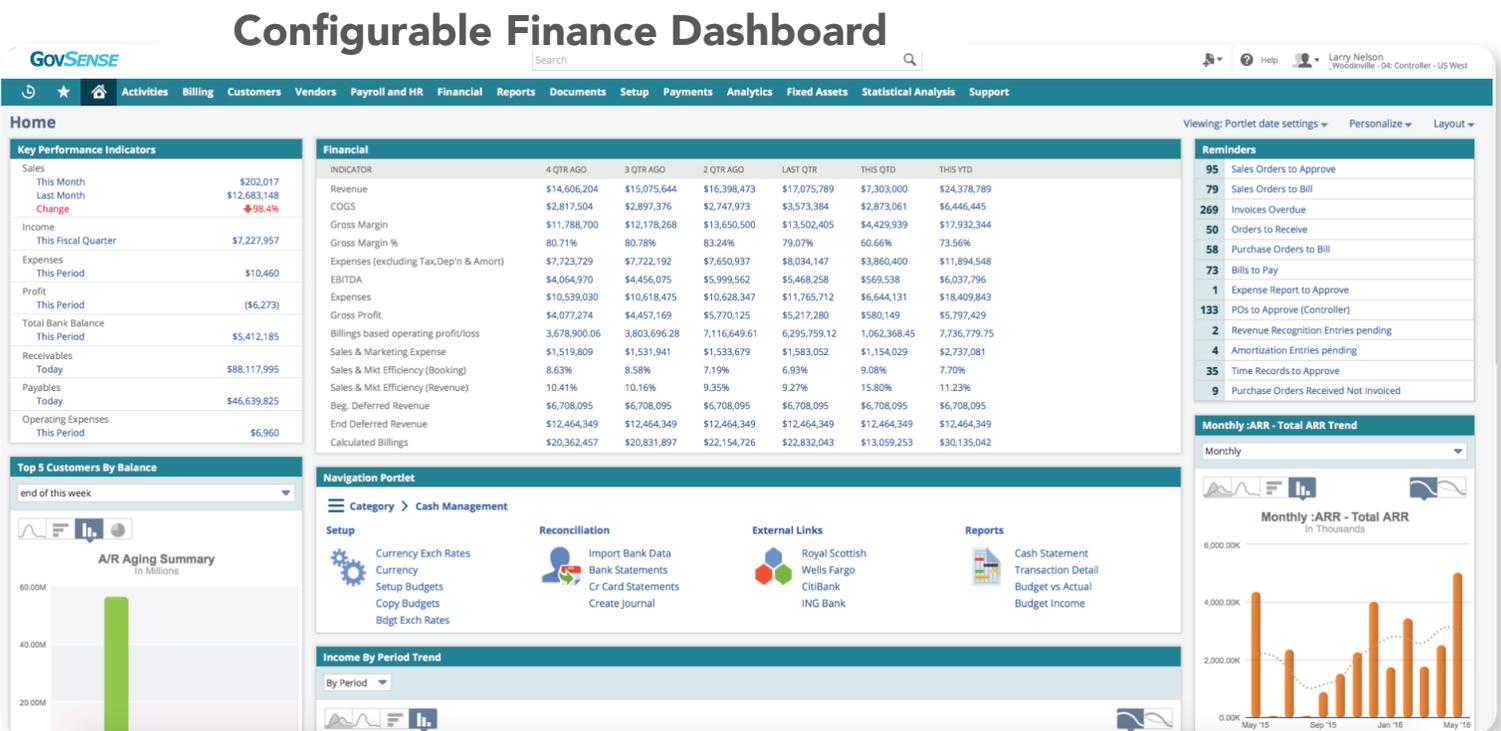

# 3 Cheaper *Streamlining maintenance & self-service*

## Fast time-to-value & ROI

A true-cloud solution is quick to implement — taking weeks, not years — and shows fast, positive impacts on your budget. Organizations using the cloud see an average ROI of 150% and experience a time-to-value of less than 2 years.

## Better-utilize the IT department

Instead of relying on the IT department to run reports, the finance team can now easily and quickly report on what they need, when they need it. This gives IT time to work on more important things like the jurisdiction's cyber security.

With our full-service ERP system, we alleviate the challenges you usually face:

- Stay on top of **accounts payable and accounts receivable** in GovSense.
- Create **detailed budget forecasts and audit logs** with just a few clicks.
- Enjoy a **consistent look and feel** in the user experience across the system.
- Utilize user-defined and configured **KPI dashboards** and reporting.
- Configurable **workflows support checks and balances**.
